Requesting Physician:  
Reference Number:

First Name: AZZAM RACHID

Last Name: AL DANDAH

Passport: N014718760

Date Coll: 07/Feb/2022 08:43

Date Rec: 07/Feb/2022 15:22

Date Verified: 07/Feb/2022 20:45

Molecular

Orderable	Specimen Type		
SARS CoV 2, NAA (9917140)	Nasopharyngeal Swab		
Test	Result	Units	Reference Range
SARS CoV 2	NOT DETECTED <sup>f**1</sup>		
f:	“Not Detected” (Negative) result indicates that SARS CoV 2 RNA is not present in patient's specimen. However, this result may be influenced by the stage of the infection, quality and type of the specimen collected for testing. Result should be correlated with patient's history and clinical presentation. SARS CoV 2 (COVID-19) by nucleic acid amplification test is based on reverse transcriptase PCR (RT-PCR) and targets at least two distinct regions in SARS COV 2 genome (ORF1 , RdRP and N gene). This test is accredited by EIAC ISO 15189.
